DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The rejection set forth under 35 USC 112 in the paper mailed 12/14/06 is deemed proper and is herein repeated. Applicants arguments have been fully considered but have been found not persuasive.

4. Applicants point to the description in the specification to describe what is meant by "derivative" in the context of the claims. This description is acknowledged but is found to be insufficient in identifying the metes and bounds of the claimed subject matter. There is no definition of "derivative" nor is it proper to read limitations from the specification into the claims. The "derivative" has no limit associated with it or are any compounds limited by the term. It is impossible for one of ordinary skill in the art to identify how far "derived" from polyisoprene the claimed compounds are. As such, the claims remain indefinite.

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 1-14 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Uto US 6,616,991.

7. The rejection set forth under 35 USC 102/103 in the paper mailed 12/14/06 is deemed proper and is herein repeated. Applicants arguments have been fully considered but have been found not persuasive.

Response to Arguments

8. In response to applicant's argument that the claims are directed to an "ink formulation," a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

9. Applicants further point out that the polyisoprene is not in the ink formulation but rather in a coating solution. This coating solution is deposited onto the ink receiving substrate and has excellent ink absorbing properties and improves the fixing property of the ink. The examiner maintains that once the ink is deposited onto the rubber coating,

then the ink formulation comprises the polyisoprene. As such, the art is seen to anticipate the ink as claimed.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
